LED & LCD VIDEOWALLS

> Please note all products have been chosen to keep build time to a minimum and are all able to be flown or installed within an aperture.

> 1.5mm LED

As our highest-resolution systems, our 1.5mm LED panels can create some of the most visually detailed displays of any supplier in Europe. Full HD (1080p) image can be achieved with a 3-metre-wide wall, whilst ultra HD (4K) can be achieved with a 5-metre-wide wall, making it ideal for spectacular detail or small text.

Like many high-end televisions, a 1.5mm wall supports HDR10 content, giving superb visibility and contrast between the light and dark elements of your content.

In addition, the panels may be installed 2.5° concave, enabling the design of immersive curved configurations, or even complete wrap-around tunnels.

> 2.6mm LED

For large-format displays, our 2.6mm options present the most versatile installation options.

Whilst full HD (1080p) resolution can be achieved with a wall of 5m metres, 2.6mm LED panels present opportunity to be installed in both convex and concave angles up to and including 10° to be built into flooring or suspended from above as a banner or ceiling.

Alternatively, they can be installed as flat floor or aperture-mounted flat screens, where full HD (1080p) can be achieved in 5 metres.

sales@dbpixelhouse.com

> 3.9mm LED

Our 3.9mm LED system presents the best option for displays for large audiences or for at distance. They are ideal for suspended banners, large posters or "big screens" for sporting applications.

The 3.9mm system is also well-suited for outdoor applications, with a wide range of brightness levels available to ensure optimal visibility and contrast, whatever the environment.

LED TRAILERS

Our screens are industry leading full HD 3.9mm pixel density for superior image reproduction and are fully height adjustable with 360º screen rotation capability.

They are quick to deploy and offer unparalleled flexibility compared to traditional truss-built LED screens.

The Pixel Trux themselves also offer branding opportunities on all 4 sides, maximising the potential for brand exposure.

VERSATILE

- The possibilities of our Pixel Trux are endless! They can be used for a range of indoor and outdoor events, from sporting events and festivals to city centre events and trade shows.

MOBILE

- Pixel Trux are reshaping events. It's now easier than ever to get huge high quality LED screen systems to, from, and around your event!

ENGAGEMENT

- Get more eyes on your content and your brand! Our 28sqm LED walls are 33% larger than the standard 21sqm and will boost engagement at your event and help you create higher levels of interest.

EASY TO USE

- The Pixel Trux are specifically designed to be swiftly deployed and easy to operate, saving time and money. Set-up takes less than an hour!

CREATIVE SERVICES

> We offer a multitude of creative services that involve content editing and creation, filming, and more

> Content Edit

Rendering content already at our disposal for LED and specific video wall configurations.
Stitching assets already made from the client into a video. Basic Fade animations, exporting to one file that will work. This can include cutting parts out.
> Video Creation

Use existing content to produce a promo video or informative piece. This will include brief overview documentation, story board, review comments, final piece, and storage for 1 year.

> Onsite Static Recording (with edit bolt-on)

We can record conferences from 1 or more angles, for specific sessions or for the organiser. Collate all the assets and send over to client with breakdown of days and sessions.

> Onsite Dynamic Recording (with edit bolt-on)

1 or more Roaming cameras on stand or venue. Recording "highlights" of the show to send to client.

> Time-lapse

Stand recording on build up / show / breakdown. This recording will be done over a longer length of time.

> Visualisations and Renders

Visualisation service for equipment, stands, exhibitions, venues, and any other 3-dimensional space to be built or quoted

HOW TO ORDER WITH US

> We're here to help you get the most from the event and shall endeavour to do everything in our control to help you achieve this.
To help us produce an accurate quotation we may require a stand plan or visual.
